**DETAILED ACTION**

**REJECTIONS WITHDRAWN**

1. There are no rejections withdrawn.

**REJECTIONS REPEATED**

2. The 103(a) and double patenting rejections of claims 3-5 only set forth in the final rejection of 1/11/05, pages 3-6, paragraphs 6-10 are repeated for the reasons of record. The 103 rejections set forth in the non-final rejection of 3/30/06, pages 2-3, paragraph 4 is repeated for the reasons of record.

**NEW REJECTIONS**

3. There are no new rejections.

***Allowable Subject Matter***

4. Claims 6-10 and 21-50 are allowed. The prior art fails to teach or suggest all the method steps and order of the steps currently claimed in claims 6 and 9-10, the order of the method steps is not obvious because any change in the order of the steps will result in different properties for the preform or container.

**ANSWERS TO APPLICANT'S ARGUMENTS**

Art Unit: 1772

5. Applicant's arguments filed 9/1/06 have been carefully considered but are deemed unpersuasive.

Applicant's summary of the teachings of Valyi and Tsukada on pages 10-11 of the response of 9/1/06 is acknowledged. Applicant has argued that the examiner's allegation the Valyi teaches sufficient expansion to orient the neck is unsubstantiated. However, it is alleged that Valyi discloses that the neck is oriented merely that it is expanded (column 4, lines 18-34). While such an expansion may be minimal it nonetheless represents expansion and reads on applicant's broad term expansion recited in the claims. It is argued, however, that Tsukada discloses biaxial orientation of a neck (column 4, lines 31-64).

Applicant has argued that one of ordinary skill in the art would not have been motivated to use the crystallization method of Tsukada in Valyi to physically and rigidly stabilize the neck section. However, Tsukada prevents damage to the neck especially when trying to pressure fit the neck finish of Valyi and therefore motivation exists to combine Valyi and Tsukada.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a

reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
